LED PROJECTION

Smart Projection, Maximum Safety

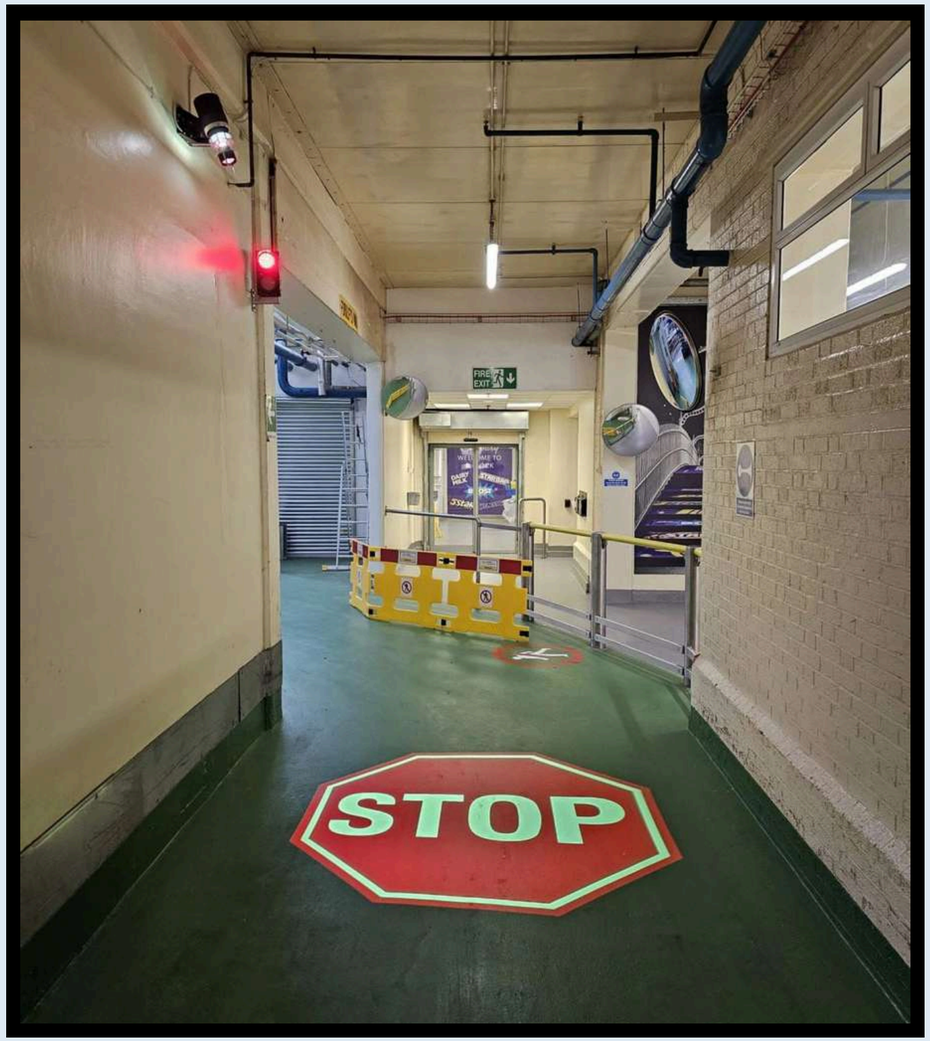

"Enhance your appearance and safety with our products!"

SAFETY, CLARITY & EFFICIENCY

WHAT WE DO:

Smart Projection, Maximum Safety

- LED Projection
- Vehicle & Safety
- AX SYSTEM
- Sensors & Accessories
- Tailored Advice
- Traffic Plans

LRI B.V.

SAFETY

"Enhance safety with our innovative solutions. No more worn or dirty markings, but always visible projected lines. Dynamic and smart thanks to sensors."

COST REDUCING

"With our products, there are no costs for cleaning, repairing, or refreshing traditional markings. No maintenance costs and always clearly visible markings."

Smart Projection,
Maximum Safety

COST REDUCING

"Our products come with a 5-year warranty, up to 75,000 operating hours, and over 30 years of benefits."

- Maximum safety
- No maintenance costs
- Decades of benefits

PEDESTRIAN CROSSINGS

Smart Projection, Maximum Safety

DYNAMIC

The crosswalk disappears automatically when a vehicle is detected

NO WEAR AND TEAR

No worn crosswalks from forklift traffic

APPLICABILITY

Suitable for any industry, even in wet and cold environments.

VISIBILITY

Guaranteed visibility, even in dirty environments.

SYMBOLS

Smart Projection, Maximum Safety

DYNAMIC

Symbols are activated when potential danger is detected

CUSTOM-MADE

Any size and color is possible

VISIBILITY

No faded or worn, poorly visible symbols

APPEARANCE

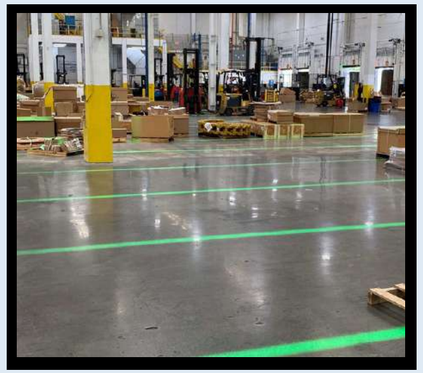

Not only increase safety but also enhance the company's appearance

WALKWAYS

Smart Projection, Maximum Safety

LOADING DOCKS

Durable lines at loading and unloading docks

NO DIRTY MARKINGS

Always clearly visible markings

STAGING AREAS

High-visibility safety lines

FLEXIBLE

Suitable for defining paths along walls and in staging areas.

MAKE IT DYNAMIC

Smart Projection, Maximum Safety

Our LED projections respond to the environment in real-time. Smart sensors detect movement and activate projections automatically.

Benefits:

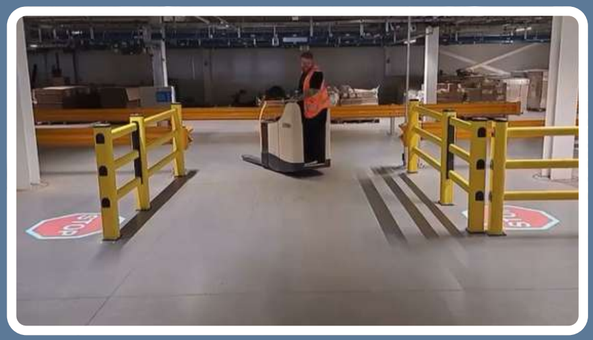

- ***Real-time markings:*** *Automatic adjustment to the situation.*
- ***Increased safety:*** *Visible warnings for vehicles and pedestrians*
- ***Efficiency:*** *No manual adjustments needed, everything happens automatically.*

This smart technology significantly enhances safety by improving visibility and preventing accidents.

1 - No Forklift

2 - Forklift Detection

3 - No Forklift

AX SYSTEM

Traffic Control System

TECHNOLOGY = KEY

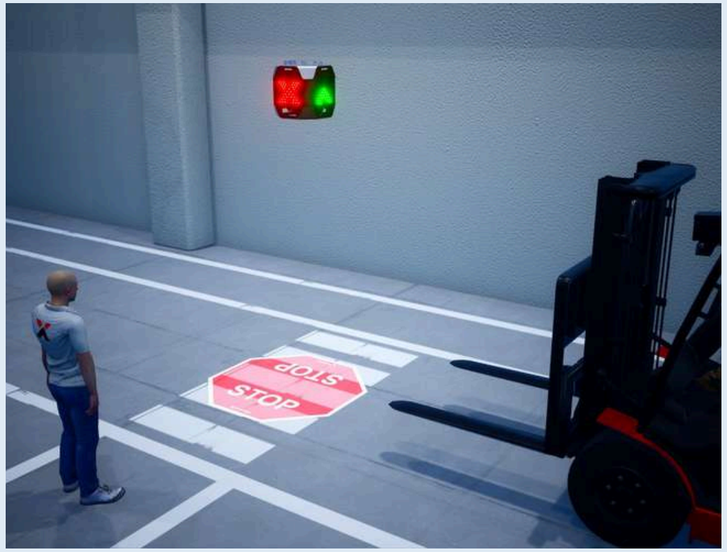

The AI-driven system takes into account the type, direction, and speed of moving vehicles or individuals to ensure reliable operation.

PASSAGES

DANGEROUS INTERSECTIONS

CROSSWALKS

The system ensures the safety of forklift and pedestrian traffic at gate crossings by detecting traffic around the gate. It provides warnings in case of collision risks and directs traffic according to the customer's traffic rules but does not intervene if the passage is safe.

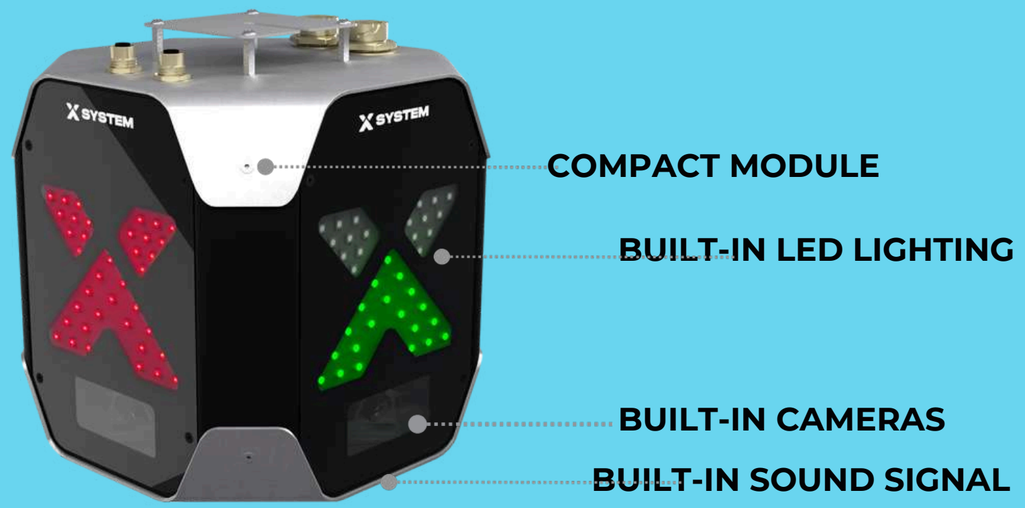

APPLICATION POSSIBILITIES

LRI B.V.

LRI B.V.

www.LRI.nu

AX SYSTEM

"This all-in-one solution includes all the necessary modules for operation. Suitable for the most common situations you may encounter in factories or warehouses."

CAMERA-CONTROLLED DETECTION

The system's cameras detect the traffic flow of forklifts and pedestrians and analyze it in real time.

CUSTOMIZABLE OPERATION

Various alarms, visual signals, and other safety devices can be connected to the system and operated individually.

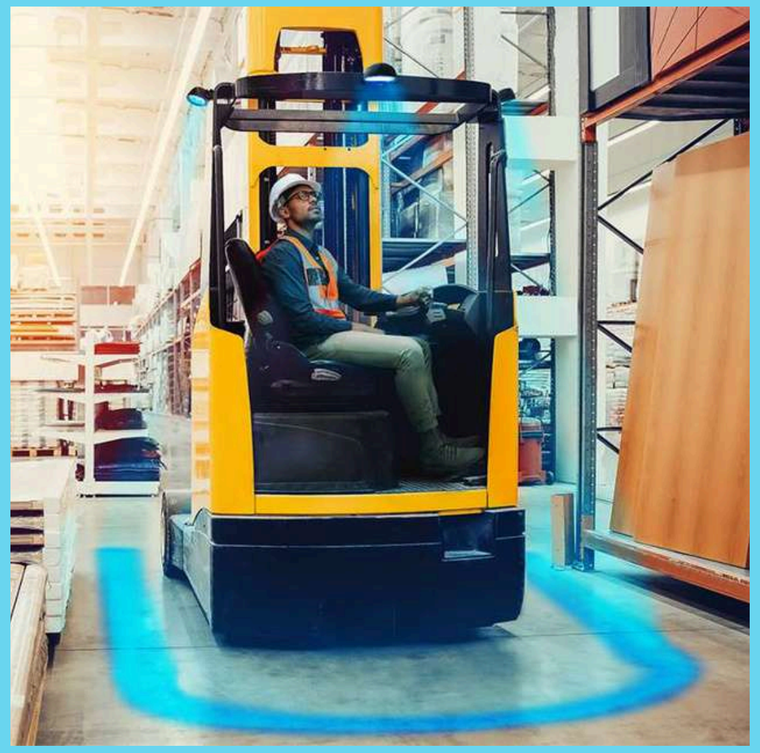

LOCAL OPERATION

No internet connection is required for operation. No personal data is collected, stored, or transmitted during operation.

LRI B.V.

FORKLIFT & SAFETY

Safer

More visible

More efficient

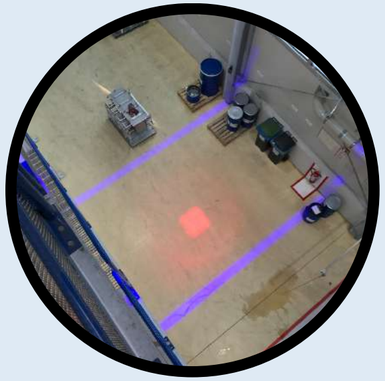

- ***Safer:*** *Safety lights, such as blue spots, make forklifts more visible, reducing accident risks.*
- ***More visible:*** *Blue light beams improve visibility, even in poorly lit or busy areas.*
- ***More efficient:*** *Fewer delays and accidents lead to smoother operations on the work floor.*

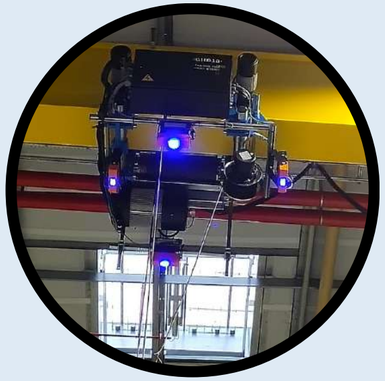

LRI B.V.

www.LRI.nu

OVERHEAD CRANES

Safer

More visible

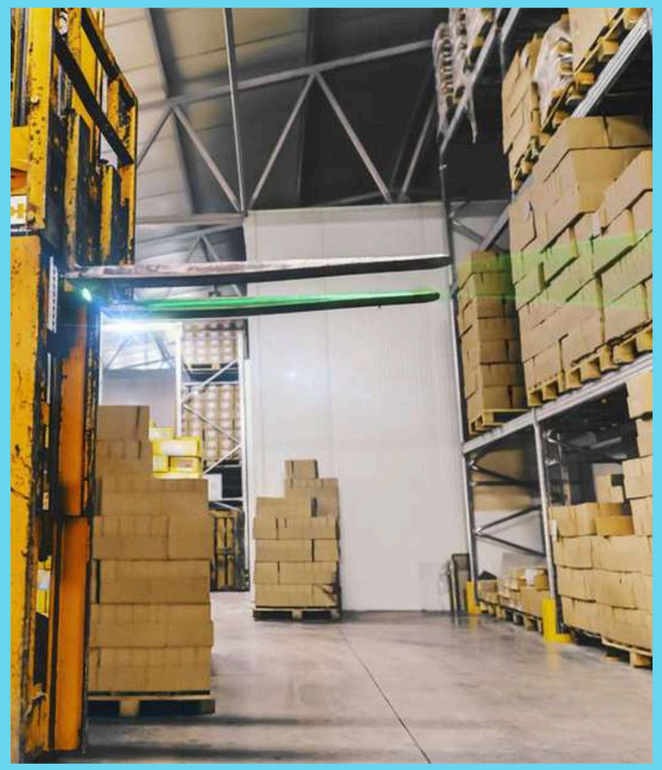

Clearer

- ***Safer:*** *Markings clearly define work zones, preventing accidents.*
- ***More visible:*** *Danger zones are more noticeable, even in poor visibility*
- ***Clearer****: Moving dots define workspaces, raising awareness of danger zones.*

TOPLINE LASER

Height sensor

- Automatically activated at a certain height
- Automatic shut-off after 2 minutes (no vibrations

Motion sensor

- Automatically activated by vibrations
- Automatic shut-off after 2 minutes (no vibrations)

Remote control

- To be activated by remote control
- Automatic shut-off after 2 minutes (timer)

- Designed to withstand heavy impacts
- Durable metal housing
- 30 seconds to install – no special tools required
- Easy maintenance
- Temperature: +10..+40°C"
- Distance indicator for double pallet fork length
- High visibility in daylight
- Long operating time – minimal maintenance
- Made in the EU (Lithuania)
- 12-month warranty

CONTACT US

Smart Projection, Maximum Safety

"Interested in one of our many products? Feel free to contact us! We would be happy to schedule a Teams meeting to explain our products, or we can visit your location to demonstrate some projectors and collaborate on the best solution for your situation."
